Backend Engineer

## EXPERIENCE

---

### Backend Engineer — Acme

Berlin, Germany | Jan 2022 – Present

*Orders API — public API behind the checkout flow*

*Go, PostgreSQL, Redis*

- Cut p95 latency from 800ms to 120ms by rewriting order lookups with covering indexes and a Redis read-through cache
- Added idempotency keys to the payment endpoint so client retries can't double-charge
- Owned releases and on-call for the service, 40+ releases so far

*Billing Worker — async invoice generation*

*Go, RabbitMQ, PostgreSQL*

- Moved invoice generation off the request path into a RabbitMQ message queue worker with retries and a dead-letter queue
- Added Prometheus alerts on queue depth and failure rate, and wrote the on-call runbook

### Junior Developer — Globex

Berlin, Germany | Mar 2021 – Dec 2021

*Internal Tools*

*Python, Django*

- Built a Django admin tool that replaced a shared spreadsheet for tracking customer refunds

## SKILLS

---

**Languages:** *Go (primary), SQL, Python (basic)*

**Data & Infra:** *PostgreSQL, Redis, RabbitMQ, Docker, Kubernetes, Prometheus*

## PERSONAL PROJECTS

---

**tinykv**

*Go, Raft*

- Toy distributed key-value store built to learn Raft

## EDUCATION

---

**B.Sc. Computer Science — Example University**

*Sep 2017 – Jun 2021*
